

WHY GREEN CANOPY?

FAMILY ACTIVITY

Tree planting is a great activity that can be enjoyed by the whole family. What a great way to spend a day, or a few hours

WETLANDS

Trees are a vital part of healthy wetlands. Planting trees near wetlands provides vital habitat for many native species

HEALTHY FOR US

Trees clean and purify the air around us, as well as providing vital Summer shade. More trees equals better health for everyone

HELP US

Do you know of areas that are in need of more trees?

Does your council have a tree planting program, but lacks the manpower to do it?

Get in touch with us so your nearest Lions Club can help!

Lions Australia
Tree Planting Project

OUR VISION

**“ONE MILLION TREES
BY JUNE 2027”**

JOIN US

If you are interested in helping the environment, you can help with the Green Canopy Project by joining your nearest Lions Club.

<https://lionsclubs.org.au/get-involved/how-to-join/>

WHY DO IT?

- **There are so many treeless housing estates**
- **Trees are still being lost across the country**
- **With rising temperatures, we need trees more than ever**
- **A green environment is great for our mental health**

KEY POINTS

- Initial project runs until June 30, 2027 with the aim of planting 1 million trees
- If extended beyond that date, the aim is to plant an extra 500,000 trees per year thereafter
- It is something that anyone can support and be involved in
- Great for family activities
- Everyone can help to make a difference to our environment!
- Australia-wide
